These memoirs reveal author's wanderings in childhood and youth, his family roots and struggles, passion in discoveries of unique physical phenomena for designing space-exploration missions, and events that led him, born to be a scientist, to the decision to leave his homeland, the Soviet Union, seek an awkward life path in the U.S., and continue the engagement in both science and teaching—the main purposes of his life.

About the Author, Vladimir V. Riabov

Dr. Vladimir Riabov is an aerospace scientist and a professor of computer science whose passion of technological innovations inspires him to search for effective pedagogical methods to awake students' curiosity. He is the author of "Hypersonic Flows of Rarefied Gases", "Thoughts on Pedagogy", and "Symphony of Life" recently published by the Outskirts Press.
